

DALLAS TEXAS - March 25, 2004

Klotron Design Studio Tools II Ready for Immediate Release

Network Management gets easier with Design Studio Tools II providing easy-to-use desktop tools that let anyone do complicated task with only a few clicks.

Today Klotron released the next generation of easy to use tools to do once was complicated systems. With the release of Tools II Klotron provides greater flexibility in making sure network management tools and information are at the user's fingertips. Klotron provides greater flexibility while reducing the time it takes to setup and manage a customer network.

"When we asked our partners and clients what they wanted in new features on top of that list was the ability to makes changes and add users on a day-to-day basis", stated John Bowling, Chief Technology Officer. With Tools II a partner or client can use an intuitive interface that requires no formal training to add user or better define a resource.

"The ability to add a user, change permissions or update parts device management has been a real plus", stated Pat Smith with PMI, Inc.

One of the additions to the tool set is a new links customization tool that allows resources to be centralized for easy access saving time and money.

One premise of the Klotron system has always been one user name and login. With Tools II Klotron and users can design sites with more relevant information and add new features, keeping access and support simple.
